

Fabric Awnings

Rollup Automatic is a traditional spring-operated roll-up with side guides and stand out Locking Arm. Ideally installed on a home with windows that get the full brunt of the sun - A complete block out!!

Available in all fabrics and styles. Rollup Suntrak is a spring operated roll-up straight drop blind that has aluminium powder - coated side channels on each side for support...

Ideal for verandahs and patios! Simply pull down & let go! (self-locking system). How Easy is That!!

Requires no effort, and does not have any untidy cords or cleats. Available in today's high performance see through fabrics. Sunmaster 40T is really our Sunbusta without arms (poor thing!) This is a straight drop screen with

extruded aluminium vertical tracks which support the screen to its destination. This also has electric options. Recent Installations include Friday's Restaurant, Marist Brothers College, and the Queensland University.

[Click Here For Demo](#). The Drop Arm. This very adaptable system can be designed to suit a wide range of needs, with many variations & control options - including tape, cord, gear or electric, even wireless remote! Our Sunesta

is the first in this series, ideal for smaller type situations. It has smaller components compared to its big brother Sunbusta which has been designed for larger exposed areas. Our new Sunvertica is the finest in German engineering and the ultimate choice in this range. Folding Arm system is a patio that rolls away!!

It's a control system that is as modern as today.

Designed to maximise entertaining & leisure areas such as patios and verandahs, and ideal for cafes and restaurants! Has controls from manual gear - box to sophisticated systems including timers, sensors and remote control. New AMA Systems available.

[Click Here for more information](#). Clear Plastic Blinds are 'windows to the world'.

Giving you protection from the elements without obstructing the view, these can be seen in many fashionable restaurants and cafes.
