

Polycarbonate Awnings

Sunorama is a polycarbonate twin wall made of space-age material that's light, tough and very attractive, making it ideal for today's modern architecture. Offers protection from all weather elements including UV penetration without impairing light transmission! Light & heat transmission vary according to tint selection. It's incredibly versatile, meaning that it can be utilised for many applications....
Pergolas, Atriums and Awnings!
Powder coated aluminium joinery.
